Input																																																												
Nominal voltage $U_{I\ nom}$	AC/DC* 230 V																																																											
Voltage range	AC 90-264 V DC* 130-300 V																																																											
* Use of DC requires external protection																																																												
Frequency	50-60 Hz																																																											
Input current I_i	0.5 A _{typ.} at AC 230 V																																																											
Inrush current	<30 A _p																																																											
Output hold-up time	>20 ms																																																											
Overvoltage protection	Varistor at primary circuit																																																											
Output																																																												
Nominal voltage $U_{O\ nom}$	DC 12 V																																																											
Voltage range	DC 11-15 V adjustable																																																											
Output current I_o	4 A at DC 12 V																																																											
Residual ripple	<100 mVpp at 20 MHz																																																											
Adjustment accuracy	2 %																																																											
Current limitation	from approx. 1.1 x I _a (see output characteristic)																																																											
Efficiency	89 % _{typ.}																																																											
Safety extra low voltage	SELV																																																											
General data																																																												
Test voltage	4.2 kV																																																											
Degree of protection	IP 20																																																											
Protection class	prepared for class I equipment																																																											
Cooling system	natural convection cooling when horizontally mounted																																																											
Design	encapsulated, for use in switchgear cabinets																																																											
Parallel connection of power supply units	not permissible																																																											
Operation indicator	LED green (12 V o.k.)																																																											
Ambient operating temperature	-10 °C...+70 °C																																																											
Derating	-3 % / K (>50 °C)																																																											
Storage temperature	-25 °C...+85 °C
