

WAGO Custom Solutions

Your Vision. Our Engineering. One Seamless Solution.

Your Projects Are Unique So Are Our Solutions

At WAGO, we know one-size-fits-all doesn't work in a world of complex, fast-paced industries. That's why our **Custom Solutions** are designed to meet the **specific requirements** of your application - with precision, flexibility, and uncompromising quality.

From modified components to fully assembled control systems, we work closely with you to **streamline installation**, **reduce downtime**, and **boost efficiency**.

What We Offer:

Custom-Built Assemblies

Pre-wired, pre-tested, and ready-to-install - saving you time and cost on-site.

Tailored Product Modifications

From custom labelling to special configurations and components designed around your needs.

Complete System Integration

Control cabinets, terminal boxes, and more - delivered as ready-to-use, plug-and-play solutions.

Engineering Expertise

Partner with our technical teams for planning, documentation, and ongoing support.

Smart Logistics

Just-in-time delivery, custom packaging, and traceability built into every order.

Why Choose WAGO Custom Solutions?

- Reduce installation time and labour costs
- Eliminate wiring errors and rework
- Ensure consistent, certified quality
- Reduce your inventory level
- Purchasing made easy
- Accelerate project timelines
- Focus on your core business - we'll handle the rest

Ideal Applications:

- Industrial Automation
- Energy & Infrastructure
- Building Technology
- OEM & Machine Building
- Transportation Systems

Custom Cable Solutions - Made Easy

We take care of everything for you - from supplying WAGO components to sourcing all the necessary external materials like cables and connectors. You'll receive fully assembled, wired, and tested cables, all under a single, convenient purchase reference. It's a simple, efficient way to get exactly what you need, ready to use.

Ready-to-Use Cables - Cut, Equipped & Time-Saving

Get your flat cables precisely cut to length and fitted with power modules and splitters. Designed to streamline your projects and boost efficiency, so you can save valuable time on every job.

- Connection of Splitters on Cables
- Delivered in sections cut to your dimensions
- Equipped according to your installation requirements

Custom Interfaces - Streamline Your Electrical Cabinets

Our tailored interface modules are designed to optimise your specific applications by consolidating multiple functions into a single unit. This significantly reduces wiring complexity and saves you valuable time. Built to meet strict electrical safety and EMC standards, our CE-marked interfaces ensure reliability and compliance you can trust.

- Production of Interface Modules for Electrical Cabinets
- Full development handled from start to finish
- Electrical and CAD design
- Manufacturing and wiring of printed circuit boards
- Modules 100% tested at the end of production
- Laboratory testing according to applicable standards

Popular Solutions Trusted By Our Customers

Ready-to-Install Rail Assemblies – Customised, Labelled & Wired

Save time and streamline your process with our custom-built rail assemblies, tailored exactly to your specifications. Delivered fully assembled, clearly labelled, and pre-wired, if required. Just unpack and install into your electrical cabinet. It's that simple. Maximum efficiency, zero hassle.

- Product assembly without DIN rail
- Products mounted on DIN rail
- Dimensions and drilling according to your specifications
- Marking and labelling
- Wired or unwired
- Visual and electrical inspection

Plug-and-Play I/O Modules – Assembled, Labelled & Wired

We do more than just assemble - we program and load your controller so you receive a fully functional, ready-to-use solution right out of the box. Designed to match your exact requirements, our all-in-one service helps streamline your setup and keep your projects moving forward, faster.

- Installation of I/O equipment in rail assembly
- Wiring available
- Rail cutting and drilling according to your specifications
- Module marking
- Optional program loading
- Inspection and testing before shipment

Fully Equipped & Wired Enclosures – Ready to Go!

Get your enclosure delivered complete, wired, and tested. Say goodbye to costly errors and time-consuming troubleshooting in your projects.

We manage everything for you, from WAGO components to sourcing and supplying all the additional equipment you need. Streamline your workflow and focus on what matters most!

- Supply of metal or plastic enclosures
- Fully equipped
- Marking and labelling
- Wired
- IP rating and glanding according to your specifications
- All enclosures are electrically tested

Our EMEA Region Hubs

WAGO has proudly supported customers across the EMEA region from our strategically located hubs.

This enables us to deliver fast, reliable service and solutions tailored to your needs.

With multiple offices across the region, our dedicated sales teams are always close to you, ready to provide expert support. Our flagship sites combine advanced production capabilities, precision assembly, and innovative design - all focused on creating cutting-edge automation solutions. Plus, our skilled engineers and software developers work hand-in-hand with you to craft custom applications and programs that perfectly complement our products.

Partner with WAGO and experience seamless integration, exceptional quality, and tailored support - all designed to accelerate your success across the EMEA region.

> [Locate Your Nearest Regional Office Here](#)

All our hubs feature:

Design Office

A team of experts trained in the latest design and wiring project software supports you from the initial schematic design to the implementation of your products on-site.

Mechanical Workshop

- Machining
- Milling, cutting, and dimension-specific trimming
- Punching

Assembly / Wiring

- Assembly according to specifications
- Wiring
- Prototyping
- Custom cables and enclosures
- Marked terminal blocks installed
- Automation terminal blocks

Printed Circuit Board Workshop

- ESD protected area
- Wave soldering
- 100% functional testing

Testing

- Functional testing of 100% of products
- Dielectric testing
- Thermographic testing
- Pull tests
- Climatic testing
- EMC testing

Warehouse

- Optimised storage with automated lean-lift system
- Packaging in designated zones
