

# Data logger

Solution  
Package

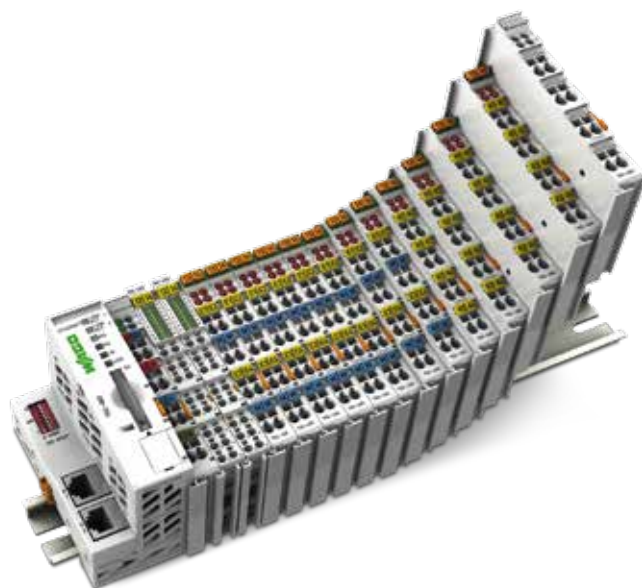

Modbus/TCP

Flexible capture, logging  
and processing of measuring signals

**WAGO**®

## The Solution Package Data logger by WAGO offers you:

- A flexible-to-configure measurement signal acquisition,
- Recording up to 80 analog or digital signals,
- Individually processing of recorded data, if required,
- Adding WAGO-I/O-SYSTEM 750 modules,
- Storing process data on a removable device,
- Visualizing recorded data,
  - current value
  - displaying the last 20 values/channels in tabular form
  - trend curve presentation of the last 100 values/channel
- Language selection (DE, EN, and the possibility of another translation is already prepared)

## Your advantages with WAGO:

- Maximum flexibility
- Low investment costs relative to overall functionality
- Free of charge, fully functional user-application
- Data storage in open CSV format
- Open source text
- Individual expansions and/or program modifications are possible

The open-source solution package allows individual functions to be added at any time. Examples from our application notes:

- Transmission of process values/changes via SMS and/or email
- Data transmission via SQL databases
- Connection to control systems from different manufacturers
- Connection to IT via SNMP
- Value integration in Web server
- etc.

**Please contact us for further information! We are always ready to help!**

### Potential node structure for 32 digital and 48 analog channels:

1 x	ETHERNET Controllers	750-880
2 pcs.	16-Channel Digital Input Modules	750-1405
8 pcs.	4-Channel Analog Input Modules	750-455
4 pcs.	4-Channel Analog Input Modules	750-460
1 pc	End Module	750-600
1 pc	24VDC Power Supply, 2.5 A	787-1012
1 pc	SD Card, 1 GB	758-879/000-001

CODESYS application with user interface WebVisu  
Application Reference A116602 + Quick Start Guide
