TOPJOB® S Terminal Blocks Now Even More Compact

Germantown, WI—March 2021— WAGO's new TOPJOB® S Mini terminal block series has all of the advantages of our TOPJOB® S line, but with an even smaller footprint. At a size 60% smaller than our standard terminal blocks, the Mini features the same industry-proven, Push-in CAGE CLAMP® connection technology used throughout our TOPJOB® S series.

These blocks are available with open tool slot or the easy-to-identify orange push buttons that can be easily actuated with any standard tool. The TOPJOB® S Mini terminal blocks are able to be mounted in various ways: miniature rail, snap-in mounting foot for chassis mount or direct mount with fixing flange.

With its compact size and features, our TOPJOB® S Mini terminal blocks are a perfect solution where space is limited or where use of DIN rail is not possible.
